

Campbell-Stone Apartments Inc.

Report to the Regional Assembly, Christian Churches (Disciples of Christ) in Georgia

November 13, 2016

I am pleased to report that the Campbell-Stones are doing very well.

We are in the midst of renovating the ninth floor assisted living unit at Sandy Springs. This renovation will create a more welcoming and updated appearance of the unit as well as improving the efficiency of caring for the residents who live there. Renovations will be completed before the Christmas holidays.

We recently completed re-decorating the elevator lobbies at Buckhead and are now in the process of replacing two elevators that were disabled due to age and lightning strikes. The contractor has estimated the replacement to take up to six months as the work must be completed in stages.

Both facilities are fully staffed with highly trained and experienced professionals dedicated to providing residents with a nurturing environment that enhances quality of life with mutual respect for all.

We are currently experiencing a waiting list of over a year and the Board is developing a long range strategic plan to ensure that Campbell-Stone continues to provide exceptional service to the ageing community for many years to come.

Respectfully submitted,

Dan McBride  
President, Campbell-Stone Board of Directors
